Mr. George L. Hobby
Group Supervisor
Space Biology Group
Jet Propulsion Laboratory
Pasadena, California

Dear George:

Enclosed is some information on Dr. Kageyama. I can add my own high recommendation from interviewing him in Tokyo.

My proposal has been to invite Dr. Kageyama to work here on our multivator project for one to two years. We could hire him as a research associate. I thought it would be advantageous to give him a fellowship, especially if this could include some provision for his travel expenses in coming here.

Any suggestions would be appreciated.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
